ventas@max4technologies.com

Applications:

IDEAL FOR: HOSPITALS, COMPANIES, OFFICES, LABORATORIES AND PRODUCTION LINES.

It irradiates an optimum wavelength on the 254 nm band that disinfects in a terminal manner avoiding human contact with polluted surfaces. Installations will be ready to use in minutes and without issues.

By using 6 maximum power lamps, MaxUV360 kills bacterias and viruses in a range of 99% through the irradiation of ultraviolet short-wavelength light.

Factory warranty in MaxUV360 equipment

UV lamps lifetime

Lamps specially designed for hospitals and operating rooms disinfection.

Characteristics:

- ✓ Six 30W 1.6m long lamps
- ✓ 360° UV irradiation
- ✓ On/Off remote control
- ✓ Timer system
- ✓ Infrared sensors for movement detection
- ✓ Approximate weight 28kg, resistant and easy to move
- ✓ Measures: 145 cm X 40 cm

Easy, fast, safe and eliminates **99.5%** virus and bacterias in 10 minutes.
